TrueFit Announces Release of Rename & Merge .Net

PITTSBURGH, PA – December 14, 2009 TrueFit is pleased to announce version 4 (.Net) of their successful Rename & Merge product. Rename & Merge is built as a third-party solution for the Infor VISUAL ERP product line and allows administrators to keep data up to date as business changes require. Rename & Merge can be used to correct master records, reconfigure account structures, change part stock units of measure and more, all while maintaining database integrity.

Scott Maxwell, Senior Software Engineer and Rename & Merge Project Manager, says, "This version is a complete rewrite of a successful product. We moved from old technology to Microsoft's .Net platform in order to provide scalability and multi database functionality to an already solid product."

Maxwell continues, "With this new version, we now have the ability to add database connectors to Rename & Merge, allowing the user to perform their tasks on different types of VISUAL databases, such as VISUAL Global Financials."

About TrueFit Solutions, Inc

TrueFit combines inspiration and collaboration to create technology solutions that truly fit a company's needs and enable that organization to work better, faster and smarter. Our technology solutions are business solutions that empower individuals and organizations to be more flexible, agile and responsive. TrueFit partners with companies and organizations in manufacturing, distribution, health care, financial services, professional services, and a host of other industries and professions.
