

Rename & Merge

has this ever happened...

- Your Manufacturing Manager wants to change part numbering schemes
- Your Engineering team just finished prototype design, but the engineering manager wants to rename parts for production
- An overzealous salesperson enters the same customer twice
- Your company just purchased a new division and Accounting wants to consolidate accounting processes
- The CEO is tired of sifting through stacks of the same information each quarter and wants to consolidate duplicate part id's
- Your stockroom is frustrated with tracking the same part in five different locations when it is only stored in one location

...and **YOU** were told to fix it?

Now you can... **Rename & Merge** allows your data to keep up with your business. Correct master record mistakes, reconfigure account structures, manage stock locations and much more! Tasks are created and batch managed with an easy to use interface.

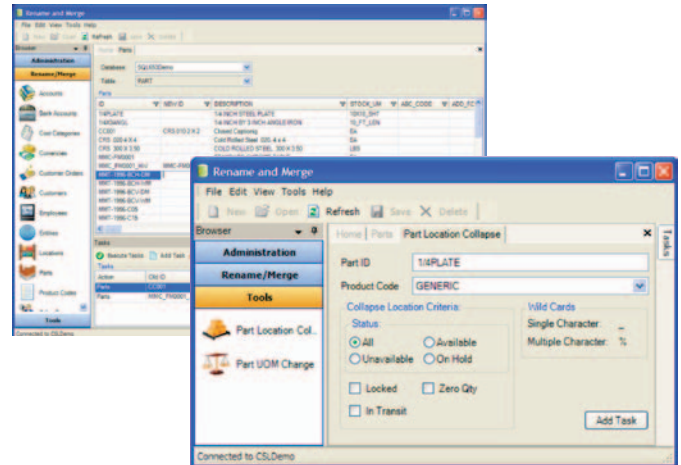

Rename & Merge is the only database utility which allows you to manipulate ID's within a live database while maintaining data integrity.

features include:

- Multi Database Support - Manufacturing, Global Financials, and More Coming Soon
- User control over database locking/unlocking during application run
- Referential integrity checks
 - Turn on/off referential integrity checks during the task run
 - Ability to scan database foreign keys to locate all existing orphan data

tools:

- Part Location Collapse
 - Method to surgically collapse/remove part warehouse/location into their primary warehouse/location
- Part stock Unit of Measure conversion
- Custom Table Processing

- GL Accounts
- Bank Accounts
- Commodity Codes
- Cost Category IDs
